### Investment strategy

The Fund's primary investment objective is to achieve capital appreciation by investing in a diversified, yet concentrated portfolio of publicly listed life sciences companies (including biopharmaceutical-, specialist pharmaceutical-, medical device-, drug delivery-, vaccine- and diagnostic companies). The majority of the Fund's portfolio will consist of European companies listed on one of the (main) European stock exchanges, with a market capitalization of below € 1 billion at the time of investment. The Fund Manager believes that in particular this sub-segment of companies – generally referred to as the small- and midcap- segment – offers great potential for value growth.

### Manager's comments

In the month of June, the Fund has increased the number of companies in its portfolio to more than ten. The Fund now holds positions in six European countries and in the US. Still a significant component of the Fund assets are held in cash but a number of investment opportunities are currently being analyzed and may lead to additional investments in the month of July. The Fund also participated in a number of primary transactions, more of which are anticipated to be launched in the coming weeks and these may be of interest to the Fund to participate in. As anticipated at the time of the launch of the Fund, most investments in the portfolio qualify as "therapeutic companies", e.g. companies that develop and/or sell new medicines.
