### Investment strategy

The Fund's primary investment objective is to achieve capital appreciation by investing in a diversified, yet concentrated portfolio of publicly listed life sciences companies (including biopharmaceutical-, specialist pharmaceutical-, medical device-, drug delivery-, vaccine- and diagnostic companies). The majority of the Fund's portfolio will consist of European companies listed on one of the (main) European stock exchanges, with a market capitalization of below € 1 billion at the time of investment. The Fund Manager believes that in particular this sub-segment of companies – generally referred to as the small- and midcap- segment – offers great potential for value growth.

### Manager's comments

November has been the worst month of the year with all stocks showing a downward trend. Key positions of the fund have lost further value, but none due to company specific factors. In fact, all the portfolio holdings are developing well and largely in accordance with their projected plans. Overall, European stocks in general and small cap stocks in particular, have been hit hard due to deteriorating market sentiment. The fund has added to a number of positions taking advantage of attractive valuations.
